Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al (U.S. Patent 5,066,043 A) for the reasons of record.

3. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Neal (U.S. Patent 5,277,858 A) for the reasons of record.

Claim Rejections - 35 USC § 103

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in

Art Unit: 1732

order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Nishikawa et al (U.S. Patent 5,066,439 A) or Neal (U.S. Patent 5,277,858 A) as applied to claim 4 above, and further in view of Ruitenberg et al (U.S. Patent Application Publication 2004/0032049 A1) for the reasons of record.

Response to Arguments

6. Applicant's arguments filed on 06 August 2007 have been fully considered but they are not persuasive.

7. Applicant argues (pages 3 and 4) that Nishikawa et al requires a steam jet apparatus and heated plates, which also requires a large installation space and leads to economical difficulties. Examiner responds that Nishikawa et al anticipates claim 4 because Nishikawa et al identically teaches the three steps (i.e., spinning, drawing and relaxing) recited in claim 4. Any additional teachings of Nishikawa et al (e.g., apparatus structure) do not diminish the teachings of Nishikawa et al which are relevant to instant claim 4.

8. Applicant argues (page 4) that Nishikawa et al does not teach the recited range of spinning speed and relaxation

Art Unit: 1732

temperature. Examiner responds that Nishikawa et al does teach these ranges (e.g., col. 2, line 62 and Example 1 (col. 6, line 24)). Note that a reference is not limited to just its preferred embodiments and/or particular examples.

9. Applicant argues (pages 4 and 5) that Neal requires heated rollers enclosed within a heated roller box, which entails the same problems as in Nishikawa et al. Examiner responds that Neal anticipates claim 4 because Neal identically teaches the three steps (i.e., spinning, drawing and relaxing) recited in claim 4. Any additional teachings of Neal (e.g., apparatus structure) do not diminish the teachings of Neal which are relevant to instant claim 4.

10. Applicant argues (page 5) that Ruitenbergh et al does not apply two-stage relaxation in the examples. Examiner responds that Ruitenbergh et al teaches two-stage relaxation (paragraph [0028]) and a reference is not limited to just its preferred embodiments and/or particular examples.

Conclusion

11. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS

Art Unit: 1732

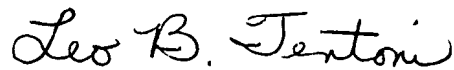

of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
